## INTERNATIONAL SEARCH REPORT

Internal Application No PCT/IL 99/00055

			,	
A. CLASSIFICATION OF SUBJECT MATTER IPC 6 G06F17/30				
According to	n International Patent Classification (IPC) or to both national classific	ation and IPC		
B. FIELDS SEARCHED				
Minimum do IPC 6	cumentation searched (classification system followed by classificati $G06F$	on symbols)		
Documentat	ion searched other than minimum documentation to the extent that s	uch documents are includ	ded in the fields searched	
Electronic de	ata base consulted during the international search (name of data ba	se and, where practical, i	search terms used)	
C. DOCUME	ENTS CONSIDERED TO BE RELEVANT			
Category °	Citation of document, with indication, where appropriate, of the relevant passages		Relevant to claim No.	
A	TAKADA T: "Multilingual information exchange through the World-Wide Web" COMPUTER NETWORKS AND ISDN SYSTEMS, vol. 27, no. 2, 1 November 1994 (1994-11-01), page 235-241 XP004037994 the whole document		1-40	
A	HAHN M: "UNIFORM RESOURCE LOCATORS" EDPACS, vol. 23, no. 6, 1 December 1995 (1995-12-01), pages 8-13, XP000566203 page 11, line 38 -page 12, line 16		1-40	
Further documents are listed in the continuation of box C.  Patent family members are listed in annex.				
*To later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention string date.  *To later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention string date.  *To document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified).  *To document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified).  *To document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.  *To document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combined with one or more other such documents, such combined with one or more other such documents, such combined with one or more other such documents, such combined with one or more other such documents, such combined with one or more other such documents, such combined with one or more other such documents, such combined with one or more other such documents, such combined with one or more other such documents, such combined with one or more other such documents, such combined with one or more other such documents, such combined with one or more other such documents, such combined with one or more other such documents, such combined with one or more other such documents,		not in conflict with the application but If the principle or theory underlying the lar relevance; the claimed invention red novel or cannot be considered to e step when the document is taken alone lar relevance; the claimed invention red to involve an inventive step when the ined with one or more other such docu- ination being obvious to a person skilled of the same patent family

## INTERNATIONAL SEARCH REPORT

Box I	Observations where certain claims were found unsearchable (Continuation of item 1 of first sheet)		
This International Search Report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:			
	Claims Nos.: because they relate to subject matter not required to be searched by this Authority, namely:		
٤ ـــــا	Claims Nos.: because they relate to parts of the International Application that do not comply with the prescribed requirements to such an extent that no meaningful International Search can be carried out, specifically:		
3.	Claims Nos.: because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).		
Box II Observations where unity of invention is lacking (Continuation of item 2 of first sheet)			
This Inter	national Searching Authority found multiple inventions in this international application, as follows:		
1.	As all required additional search fees were timely paid by the applicant, this International Search Report covers all searchable claims.		
	As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.		
3.	As only some of the required additional search fees were timely paid by the applicant, this International Search Report covers only those claims for which fees were paid, specifically claims Nos.:		
	No required additional search fees were timely paid by the applicant. Consequently, this International Search Report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.: $1-40$		
Remark	on Protest  The additional search fees were accompanied by the applicant's protest.  No protest accompanied the payment of additional search fees.		

## FURTHER INFORMATION CONTINUED FROM PCT/ISA/ 210

1. Claims: 1-40

A page retrieval method for entering non-standard URL addresses into a WWW browser URL entry field.

2. Claims: 41-48

A server system for converting input information provided to it into a WWW site address.

3. Claims: 49-77

A software unit adding at least one functionality to a user interface of a www browser.

4. Claims: 78-80

A page retieval method where the WWW browser entry field information is spell corrected.

5. Claim: 81

A method of accessing an internet resource where the WWW browser entry field information does not even comprise a partial address.

6. Claims: 82-85

A method of e-mail addressing.
